DISCOVER THE ENDO ASSISTANT JENI!

CanalPro Jeni

Digital assistance system for canal preparation

 New, autonomous assistance system for canal preparation

 Perfectly matched to four file systems

 Apex locator – measuring length without interruption

CanalPro Jeni, complete set

60023659 | 3 673 € + VAT

- 1 × Control unit
- 1 × Motor with apex measuring contact
- 1 × Fully insulated angled handpiece 1:1
- 1 × Bluetooth foot switch
- 1 × Power supply
- 1 × Apex cable set
- 1 × Holding bracket for apex cable

 Reach your objective efficiently with the Jeni mode

 Irrigation with aplomb

 File-Performance Indicator

 Flexible use via Doctor's Choice function

 Future-proof with updates

CanalPro CalciSeal

NEW!

Calcium Silicate based
Bioceramic Root Canal Sealer

Why choose CanalPro CalciSeal?

- 1 High concentration of calcium silicate
- 2 Ideal thixotropy for perfect obturation
- 3 Excellent radiopacity
- 4 Thin, flexible tips for precise application
- 5 High pH for antimicrobial protection

The bioactive, hydrophilic formulation promotes mineral interaction with dentin while maintaining high flowability for optimal adaptation, including lateral canal anatomy.

Controlled moisture tolerance simplifies handling, enabling consistent results and time-efficient endodontic procedures.

CanalPro CalciSeal

60043033	99.90 € + VAT

- 1 x Syringe 2g
- 10 x Plastic disposable tips
- 5 x Metal disposable tips

HyFlex K-Files

Manual securing files

HyFlex K-Files provide clinicians with an immediate tactile assessment of canal anatomy, curvature, and mineralization. They support reliable treatment planning by indicating case complexity at an early stage and help clinicians select the optimal shaping sequence while minimizing initial mechanical stress. They are suitable for manual scouting and for the initial shaping of root canals during endodontic treatment.

- Twisted K-Files for manual scouting and root canal shaping
- Available in sizes 006 - 045 and in lengths 21, 25 and 31 mm
- Blister pack of 6 pre-sterilized K-Files
- Square cross section for higher torsional resistance

CanalPro X-Move

Full Freedom of Movement

The wireless CanalPro X-Move endomotor provides two movement modes, a full rotating and a reciprocation motion for all common file systems. The motor stands for simple handling and great flexibility.

Ask your COLTENE distributor for a price quote.

TECHNICAL SPECIFICATIONS

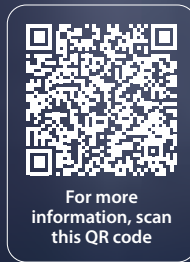

- Contra angle: 360 degrees rotation
- Torque range: 0.4 – 5.0 Ncm
- Speed range: 100 – 2500 rpm
- Adjustable reciprocating angle: 10° interval
- Adjustment range 20° – 400°
- Mini insulated contra angle with diameter of 8 mm and a height of 9.7 mm

Normal contra angle head & neck

HyFlex – OGSF Sequence

Features and Benefits

- Efficient treatment with high cutting performance
- High fracture resistance and flexibility
- Centered preparation of the canal
- Only one shaping file
- Sterile blister
- 3 lengths: 21, 25 and 31 mm

1
Opener

400 rpm
Max torque
2.5 Ncm

2
Glider

300 rpm
Max torque
1.8 Ncm

— Working length

Pre-Sterile
Immediately usable

Excellent fracture resistance

Safer treatment thanks to the unique hardened surface

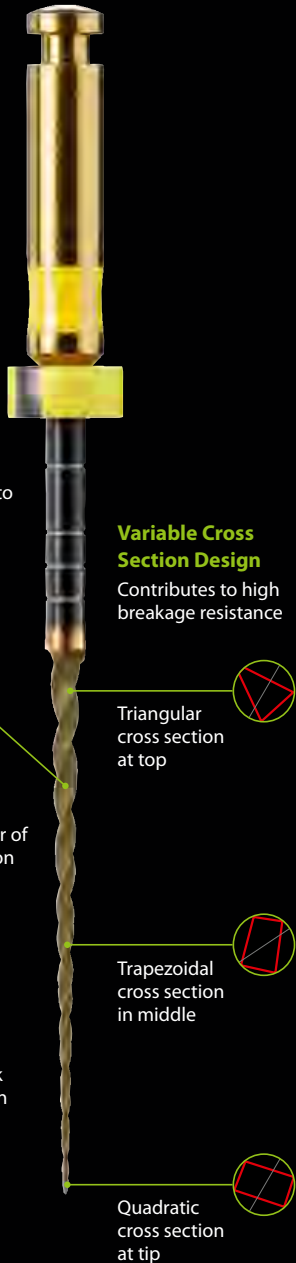

Powerful cutting performance

Allows a smaller number of files for quick preparation

Highly flexible and pre-bendable

Evenly, centered preparation reduces risk of ledging or perforation due to the controlled memory effect

Variable Cross Section Design

Contributes to high breakage resistance

Triangular cross section at top

Trapezoidal cross section in middle

Quadratic cross section at tip

A-SILICONE BITE REGISTRATION MATERIAL

Jet Blue Bite

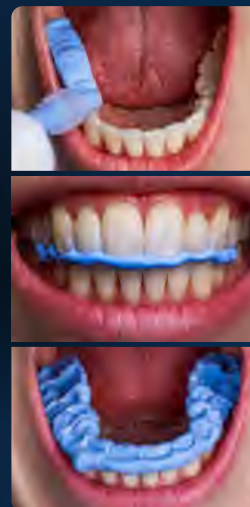

Bite registration with the highest precision

Accurate bite registration is essential to ensure a true-to-life representation of the occlusion between the upper and lower teeth in the articulator. Correspondingly, the requirements placed on the material are varied. COLTENE's decades of expertise in high-quality silicone materials are reflected in Jet Blue Bite, a bite registration material that delivers fast and precise results.

Bite register	Silicone	Shade	Shore hardness*	Dimensional stability	Working time	Setting time	Taste
Jet Blue Bite fast	A		88 A	0.08 %	30 sec.	40 sec.	Neutral
Jet Blue Bite superfast	A		88 A	0.12 %	20 sec.	30 sec.	Neutral

*Shore hardness can vary between +/-2

Mousse-like consistency

- ✓ Completely natural occlusion thanks to the mousse-like consistency
- ✓ No rebound effect when biting down
- ✓ Does not seep into interdental spaces

RESORBABLE HAEMOSTATIC GELATINE SPONGES FOR RELIABLE AND EFFICIENT BLEEDING CONTROL

roeko Gelatamp

Fast initial haemostasis

ABSORPTION

COLLOIDAL
SILVER

- ✓ For the prophylaxis of wound infections and secondary haemorrhaging.
- ✓ The only gelatine sponge with colloidal silver.
- ✓ Haemostatic and antibacterial.

ROEKO Gelatamp 14 × 7 × 7 mm

Box of 20 pcs.	274002	22.02 € + VAT
Box of 50 pcs.	274007	50.65 € + VAT
Box of 10 double blisters (20 pcs.)	274008	24.47 € + VAT

roeko Gelatamp forte

High speed absorption

ABSORPTION

ROEKO Gelatamp forte consists of a special sponge structure for a quick absorption. Absorbs up to 60x its weight in the first minute; promotes coagulation within minutes. It is a 4 mm slim white sponge which helps reduce surgery time and induces haemostasis even after treatment with anticoagulant medications.

ROEKO Gelatamp forte 10 × 10 × 4 mm

Box of 24 pcs.	60036568	38.57 € + VAT
----------------	----------	----------------------

roeko Gelatamp white

High absorbency

ABSORPTION

- ✓ ROEKO Gelatamp white is a universal sponge for general surgical procedures. It is a standard white cubic sponge 10 × 10 × 10 mm.
- ✓ Effective in routine bleeding control, absorbing fluids and assisting in coagulation.
- ✓ High absorbency, high biocompatibility, and easy to use for various surgical applications.

ROEKO Gelatamp white 10 × 10 × 10 mm

Box of 24 pcs.	60052842	18.45 € + VAT
