

# CLEARFIL™ SE PROTECT

The antibacterial bond system

## THE ANTIBACTERIAL BOND SYSTEM

With the new and versatile CLEARFIL™ SE Protect this antibacterial adhesive is made future proof. It's the next version of the world's first self-etching adhesive with a reliable antibacterial effect. Thanks to the unique anti-bacterial monomer MDPB, CLEARFIL™ SE Protect exhibits an "Antibacterial Cavity Cleansing Effect". CLEARFIL™ SE Protect is now a self-etch universal adhesive. Just use the self-etch primer with the bond to create your direct restorations. For bonding indirect and core build-up restorations you just mix it with our all-new CLEARFIL™ DC Activator. Curious about how this is possible? It's all about the right mix of Kuraray Noritake Dental's proven MDP and antibacterial MDPB technologies to give you long-lasting results.
