

X-Smart® Go

Cordless Endo Motor with Integrated Apex Locator

Mobility without compromise

Our most powerful cordless endo motor
(Up to 6 Ncm torque and 2,500 rpm)

Engineered to maximize
Dentsply Sirona file performance

Accurate, real-time apex location

24-month warranty¹

The X-Smart® Go cordless motor is the right partner for your file.

Ready to take your endo procedures to the next level? X-Smart® Go is our most powerful cordless motor ever—engineered to maximize the performance of Dentsply Sirona endodontic file systems. With an accurate, real-time apex locator, clinicians can streamline the shaping procedure—moving freely and working flawlessly. And it's all backed by a 24-month warranty and wireless upgrade capabilities.

TRUSTED
ENDO
PARTNER

¹ Warranty conditions details in product IFU available at dentsplysirona.com/ifu.

The perfect match for your files is now cordless.

Freedom + power

X-Smart® Go delivers the power of a premium motor with the improved access, reach and freedom of movement of a cordless. The lightweight and well-balanced handpiece reduces hand fatigue while a specific triangular shape enhances grip and provides secure, stable tray placement.

Optimized motion

X-Smart® motors are the perfect partner for your file—engineered to maximize the performance of Dentsply Sirona files in both rotary and reciprocating motion and an easy-to-use preset instrument library.

Simplified apex location

The accurate, real-time apex locator provides the confidence for length determination while shaping, in both continuous rotation and reciprocating movements. This feature allows clinicians to define a working length and receive visual and auditory alerts when the file tip reaches the selected point in the canal, with the option to choose a specific apical action (e.g., reverse or stop).

Warranty and support

Never work without support. X-Smart® Go has you covered with a 24-month warranty, immediate product replacement and wireless upgrades.

Strong battery life

X-Smart® Go features a high-capacity battery for three days of usage when used conjointly with the handpiece cradle, which serves as a power bank.
