690119	ProphyCare Prophy Paste Single Dose, mix, 144x 2 g

Ideal for final polishing

For final polishing of teeth and fillings

Prod No	Product Description
731111	ProphyCare Prophy Paste, yellow RDA 40, 2 micron, tubes, 84 g 60 ml
690120	ProphyCare Prophy Paste Single Dose, yellow RDA 40, 144x 2 g
690119	ProphyCare Prophy Paste Single Dose, mix, 144x 2 g

Maximum hygiene

Always a fresh sealed package. No risk of cross contamination, and the highest hygiene guarantee for your patient.

Adhesive base

The single dose cup has an adhesive base that easily sticks to the glove or any other surface.

No waste

The shallow packaging with rounded edges is designed to minimize waste. All the content can easily be collected by the polishing cup.

Perfect size

Each package contains the ideal quantity for one treatment.

ProphyCare® Prophy Paste Single Dose

Prophy Paste single dose is available in assortment or refill packages. The selection guide included in each box will help you to choose the appropriate value for the treatment. The box is designed to keep the single dose cups tidily in place and quickly give an overview of its content allowing users to select what is needed for next treatment. Choose Prophy Paste after evaluating for degree of discoloration, exposed dentin or cementum, aesthetic and other restorative materials, areas of demineralisation etc. Use at least two different Prophy Paste RDA values for each treatment - RDA 250 and/or RDA 170 for cleaning and RDA 120 and/or RDA 40 for polishing.

Low abrasion and still excellent cleaning effect

Prophy Paste PRO low RDA value of 20 offers effective stain removal properties at the beginning of the treatment and decreases progressively to a lower RDA value of 5, giving the paste its final polishing properties at the end of the treatment.

One step procedure

The same paste is used for stain removal and final polishing. Prophy Paste PRO is the one-step prophy paste for outstanding cleaning & polishing results that offers decreased treatment time.

Remineralizing agent

Contains fluoride to remineralize enamel after polishing, thus supporting caries prevention.

Integrated abrasion ariability

Prophy Paste PRO's high cleaning power converts into gentle polishing as the particles fragment.

ProphyCare® Prophy Paste PRO, Lilac Universal

Prophy Paste PRO is the one-step prophy paste for outstanding cleaning and polishing results that offers decreased treatment time. The same paste is used for stain removal and final polishing. Prophy Paste PRO's high cleaning power converts into gentle polishing as the particles are fragmented. Prophy Paste PRO's RDA value of 20 offers effective stain removal properties at the beginning of the treatment and decreases progressively to a lower RDA value of 5, giving the paste its final polishing properties at the end of the treatment. Prophy Paste's mild mint taste and appealing texture is pleasant for patients of all ages and does not splatter, liquify or separate and is easy to rinse-off. Contains fluoride to remineralize enamel after polishing, thus supporting caries prevention. Available in single doses and tubes.

690125	Prophy Paste PRO, Single Dose, 144 pcs, 2g

ProphyCare® Prophy Powder

Effective powder for stain and plaque removal

ProphyCare Prophy Powder is the new effective powder for removal of stains and plaque. The Prophy Powder effectively cleans the tooth surface, penetrating into deep pits, fissures and interproximal areas. Heavy stains are thoroughly and gently removed. ProphyCare Prophy Powder contains anti-clogging agents for a trouble-free performance in any air polishing unit, ensuring an even and maximum flow of powder is continuously applied on each patient. Safe for use in all air-polishing units.

Using Prophy Powder is time saving, safe and effective for stain and plaque removal thus minimizing the operator and patient fatigue. Its lemon aroma eliminates any salty aftertaste leaving the mouth feeling refreshed.

Prod No
741000

Product Description

ProphyCare Prophy Powder,
lemon taste, supragingival, 1 x 250 g

Accessible & effective

Safe and effective way to remove stains. ProphyCare ProphyPowder will clean the tooth surface, penetrating into deep pits, fissures and interproximal areas and make you save time.

Removes heavy stains

Removes stubborn and heavy stains, with minimal damage to teeth.

Fresh lemon taste

Its lemon aroma eliminates any salty aftertaste leaving a fresh feeling in the mouth.

Anti-clogging

Contains anti-clogging agents for maximum flow and trouble-free performance in your air polishing units.

Interior webbing

Inner structure design minimizes splatter and increases friction for efficient stain removal.

Exterior ridges

Outer ridges optimize interproximal cleaning and splatter control. Soft flare improves subgingival access.

Soft edge

Flexible flare for improved subgingival access and efficient plaque removal.

Protective base

Wider base designed to prevent prophylactic paste from reaching the contra angle.

ProphyCare® Prophy Cup

Optimal cleaning, superior paste holding

The exclusive soft and flexible ProphyCare Prophy Cup flares and flexes to contours of teeth to aid in selective stain removal and interproximal cleaning with less pressure and operator fatigue. Optimized size for easy access in hard to reach areas without compromising the paste holding capacity. The unique design is suitable for treatment on adults and pediatric use and to substitute pointed polishers.
